

# Information sheet

## Emergency Response Officer – Basic course

# CCB Summary

---

- Our mission is to make people aware and proficient in the area of basic medical treatment.
- We excel at supplying customised solutions in that range from risk inventory (RI&I), company emergency plans, training and evacuation exercises to customised E-learning programmes.
- We provide training & consultancy to approximately 450 businesses and 5.000 course participants every year.
- We take much pleasure in surprising our course participants with divergent work methods.
- In 2023, the students gave our courses an average score of 8.6.
- Our training courses are certified by the NIBHV and the Orange Cross.
- Since 2022 merged with Veiligheidspiramide.
- We work with approx. 25 people to ensure optimal customer satisfaction!

*Our courses have  
been evaluated  
with an average  
grade of 8,6!*

# The CCB Group practice center

---

Our location has a unique indoor practice house of approx. 350m<sup>2</sup> where we provide realistic exercises for firefighting, evacuation and first aid. In total we use 24 rooms spread over 2 floors. The entire building is equipped with cameras so that students can watch and learn from each other.

On the 1st floor we have various possibilities to practice with real fires and extinguishers. Here you will find a kitchen, offices, warehouse and bedroom. Extinguishing can be done with spray foam, CO<sub>2</sub>, fire hose reel and fire blanket.

The practice house on the ground floor is designed in such a way that evacuation can be practiced here. The resources we can use are walkie-talkies, fire alarm systems with smoke and manual fire alarms, Evac Chair, emergency response jackets and other emergency response equipment.

# Emergency Response Officer – Basic course

---

## Summary:

- ✓ 1 day training with e-learning and maximum group capacity of 8
- ✓ Certified by  **nibhv**  
BEWUST VEILIG WERKEN
- ✓ Many First Aid exercises with the most up-to-date materials
- ✓ Indoor fire extinguishing and scenario training

# Features

## Introduction

During this course all employees will be trained and prepared for their tasks required as Emergency Response Officers according to the Health & Safety Regulations. All employees can participate in this course. There are no admission requirements or minimal educational requirements.

## Training

During the course, we go over the theoretical aspects, but we especially focus on practical exercises and questions/experiences coming from the group.

## Sections

The course contains the following sections:

- Emergency First Aid
- Non-emergency First Aid
- Fighting fire and fire prevention
- Evacuation and alarm system

## Course duration

- 1 practical day from 8:30am to 4:30pm with e-learning support.

# Features

---

## Group size and location

8 people at CCB location or in-company (at the customer's location)  
We teach in accordance with the RIVM guidelines and provide each participant their own training materials, resuscitation manikin, bandages and disinfectants.

## Exam

During the course, the instructor tests the practical skills of the participants. At the end of the course there will be an exam with multiple choice questions. The participants must complete an E-learning at home prior to the practical day.

## Certification

Once participants have passed the exam, they will receive their certificate from the Dutch Institute of General Safety Training (NIBHV). The certificate is valid for one year and can be extended after participating in the refresher course. We always automatically invite participants to attend the (voluntary) refresher course.

## Exemption

No exemption is possible during the Emergency Response Officer course.

# Price Sheet

## Costs

Emergency Response Officer – basic course (English) €333,- per person exclusive VAT.
